**MTI is committed to quality**

**MTI has the expertise to do it right the first time**

**MTI can support your development and manufacturing requirements**

## ***Facilities & Capacities***

MTI was started 1991. It consists of a specially designed building located in Southwest Montana, nestled against the beautiful Tobacco Root Mountains.

Our equipment consists of mills, lathes, drill presses, saws, grinders, welding and soldering equipment. These give us the capacity to do work for many industries from small proto-type jobs to larger production runs.

**MTI has the following Manufacturing Capacities:**

- Horizontal Cutting 13" X 9"
- Vertical Band Saw 24" X 9"
- Drilling Capacity - Includes a 3HP drilling and tapping machine with a #3 Morse Taper spindle and production table.
- Turning Capacity - Maximum turning up to 17" diameter X 64" long with removable gap to increase diameter to 26 3/8" for short lengths.
- Milling Capacity - Milling table 10" X 50" with digital read out.
- Welding, Brazing and Silver Soldering
- Assembly
- Drafting and Design
- Vendor Support - Over the years we have established a large vendor support system for casting, stamping, metal finishing and heat treating, plastic injection molding and more.

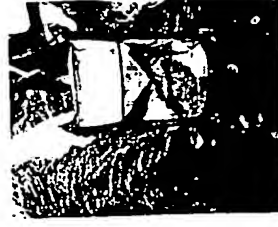

***Products***  
and New Product Development  
MTI currently markets several products. These products were designed and developed by MTI, however many of the ideas come from people like you...

**We can make your ideas a reality!**

**MTI is experienced in every phase of product development.**

- Product Development
- Conceptual to Detailed Design
- Patent Research
- Manufacturing
- Marketing

## ***Expertise***

Tom Wandlshin, President of MTI brings over 30 years experience in manufacturing and new product development.

Tom received his education at the Vocational Department, Liberty High School and Northhampton Area Community College.

Holder of several U.S. Patents, Tom has worked with the following organizations:

- Bethlehem Steel Corp.  
Central Tool Division
- ITT Corp. - Electronic Tube  
Division Research Lab
- AMP Inc. - Manager of Advanced  
Development Lab
- Dana Corp. - Mechanical  
Engineering Dept. Head
- Montana State University.

Q

## QUESTION

A

## ANSWER

WHY CAN'T THEY  
MAKE A  
SPILLESS GAS SPOUT  
WITH *FAST FLOW*?

THEY CAN...  
AND IT'S CALLED  
*FLOTEK*

STARTS WITH A PUSH  
STOPS AUTOMATICALLY  
REDUCES  
UNSAFE  
GAS SPILLS

Spilling gasoline is not only an environmental issue, it's an obvious health hazard. There's nothing more unnerving than a gas overflow on a hot engine. While there are spout devices that control spilling, they simply do not flow fast enough.

With the Flotek Spout you reduce spills, and because of its unique design the Flotek Spout is fast and steady. The flow starts with a push - when you're ready - and ends when you let up pressure, or when the tank is full... It's that simple.

The Flotek Spout comes with two cap sizes and one plate adapter to fit most gas cans. The spout can be stored in the can for easy use.

The Flotek Spout, a better way to pour gas.
